

Geothermie Rupertiwinkel GmbH

PRESS RELEASE

09. Juli 2021

Planned Geothermal Power Plant in Kirchanschöring

Kirchanschöring. The drilling works for the first well of the geothermal project Rupertiwinkel have recently been finished. As the well unfortunately does not meet the expectations, the geothermal power plant will not be realized as planned based on the available results.

Geothermie Rupertiwinkel GmbH (GTR) will therefore postpone works on further drillings and define the way forward considering the obtained findings.
